The Nine Lines of Angelic and Elohim Mastery Healing MP3 Audio Recordings

The hardest part of creating this modality was bringing in the coding for the Angelic Love and Healing Washes and Tones and Elohim Embody the Healing Templates. It took me several extremely frustrating weeks to nail this all down.

Once I fine-tuned those critical elements of the modality it was fairly easy to create nine lines of Angelic and Elohim Mastery sessions because six of them are just basically applying those two clusters of healing activations to an area like healing, negative emotions, mindsets, toxic behavior, negative personality stuff, etc.

1. **Angelic and Elohim Healing Mastery:** This line of sessions applies the Angelic Love and Healing Washes & Tones PLUS the Elohim Embody the Healing Templates to improve and upgrade the health, wellbeing and functioning of our chakras, systems, organs and the most common illness and disease states.
2. **Angelic and Elohim Emotional Mastery:** This line of sessions applies the Angelic Love and Healing Washes & Tones PLUS the Elohim Embody the Healing Templates to clear, transmute, heal, evolve, dissolve, uncreate and destroy with love all negative, fearful, unloving, toxic and dysfunctional emotions, beliefs, feelings, thoughts and attitudes.
3. **Angelic and Elohim Mental Mastery:** This line of sessions applies the Angelic Love and Healing Washes & Tones PLUS the Elohim Embody the Healing Templates to clear, transmute, heal, evolve, dissolve, uncreate and destroy with love all negative, fearful, unloving, toxic and dysfunctional random inner dialog/self talk, psychological archetypes and subpersonalities.
4. **Angelic and Elohim Mindset Mastery:** This line of sessions applies the Angelic Love and Healing Washes & Tones PLUS the Elohim Embody the Healing Templates to clear, transmute, heal, evolve, dissolve, uncreate and destroy with love all negative, fearful, unloving, toxic and dysfunctional mindsets.

5. **Angelic and Elohim Trauma Mastery** : This line of sessions applies the Angelic Love and Healing Washes & Tones PLUS the Elohim Embody the Healing Templates to clear, transmute, heal, evolve, dissolve, un-create and destroy with love all negative, fearful, unloving, toxic and dysfunctional trauma from past events.
6. **Angelic and Elohim Behavioral Mastery**: This line of sessions applies the Angelic Love and Healing Washes & Tones PLUS the Elohim Embody the Healing Templates to clear, transmute, heal, evolve, dissolve, un-create and destroy with love all negative, fearful, unloving, toxic and dysfunctional fears, phobias, bad habits and addictions.

For the last three lines of sessions, I decided to create one audio each for Financial Mastery, Relationship Mastery and Spiritual Mastery and combine them into one set of three recordings. I also created individual color healing art images for each set of mastery activations.

7. **Angelic and Elohim Financial Mastery Activations (28 activations)**: This line of activations helps us to heal our relationship with money so we can have more of it.
8. **Angelic and Elohim Relationship Mastery Activations (25 activations)**: This line of activations helps us to improve our existing relationships and to help us to create a network of relationships that supports us energetically.
9. **Angelic and Elohim Spiritual Mastery Activations (25 activations)**: This line of activations helps each of us to accelerate our spiritual growth, mastery and evolution and to grow through joy.

How It All Began

My passion in life since I turned thirty has been to heal and grow. I was on the spiritual path for many years before I began healing. I was pretty unclear when I began walking the path or the path began walking me and often I would have very rough transitions whenever I received a powerful initiation.

After recovering from a 103 degree fever, I asked my angels to help me with integration and much to my shock it worked. After that every time I did something spiritual, I would ask the angels to help me to integrate it with ease and grace.

When I was exploring an Australian ascension web site, the owner of the site described some powerful energetic healings he had received from two healers in the US. He had sent them a hundred dollars in cash and two weeks later they did the work and he raved about how clear he felt after the healing had been done.

To be honest I thought it was a scam at first and I was highly skeptical. But I kept coming back to the site and eventually I decided to order one of the healings. It was only 100 after all and I was making good money.

I forgot about until one day, I felt this huge shift in me energetically. I felt like a ton of weight had been lifted off my shoulders and I felt like I was glowing. When I arrived home I received an email from the mystery healers saying they had done the work and listing what they had done.

After this wonderful experience, I began seeking, finding and working with a wide variety of spiritual healers in addition to the spiritual teachers I was already working with.

I decided to pursue energy healing in early 2000. By that time, I had begun working with spiritual healings for over a year and I was amazed by how powerful and effective energetic healing was.

I was living in Denver at the time and when I learned that two of my favorite healers were going to be offering a week long training course in the Rocky Mountains, I immediately got that I should sign up for the class.

There were only four other students in the class and most of them were trained in several modalities. To be honest I was quite intimidated by them and felt that I may have bitten off more than I could chew.

Shockingly, I was the star student in the class easily learning the concepts and by the middle of the week I was asking questions that the instructors themselves could not answer about their modality.

This was the first of many classes and trainings I did. Energy healing came very naturally to me probably because I have done this type of work over many lifetimes and in many time space continuums.

After I was certified and trained in over ten modalities, I began offering energy healing services as a sideline to my job as a middle level manager for the State of Colorado. When I began earning as much from healing as from the state, I quit my job in 2003 and never looked back.

As I began working intensely with clients, I felt that the modalities I was trained in felt very mental and they were hard for clients to integrate with ease and grace. I remembered how helpful the angels had been when I was receiving a lot of spiritual initiations so I asked them to tweak all the modalities I had learned and to make them easier to integrate with ease and grace.

I happily offered healing sessions based upon the modalities I had learned from others for several years. Then late in 2004, they all stopped working for me. I had known for a year or two before that I should be doing my own work but it was so easy and profitable for me to do what I was doing, that I blew off the early wake up call.

By then I had determined that the core of my work would be around helping people to heal and transform their emotions and beliefs. The angels were already helping me with this so the first modality really became working with the angels to help people clear negative beliefs, emotions and past events. Eventually this became the start of Angelic Mastery. I later added on a line of angelic love and healing wash sessions and personality healing sessions.

This body of Angelic Mastery sessions helped to transition me from doing other people's work to doing my own. It prepared me to reach a place energetically where I could bring in the Practical Mastery Healing and Enlightenment Modality and the Mastery Sequences.

Anita Briggs – the founder of Inner Mastery Tools – was drawn to my Angelic Mastery and Practical Mastery sessions. She thought that Angelic Mastery could be used as a tool to help therapists. We talked about working together to develop the Angelic Mastery Healing Modality but in actuality by the time we finished the Angelic Conscious Embodiment sessions to help people embody their soul, Inner Mastery Tools took off for her and I was drawn into the Heart Oriented Ascension body of work.

An old client recently ordered the Angelic Conscious Embodiment Practitioner Training and was very interested in working with the angels in her new healing practice. When I tuned in I got that she would be an awesome Angelic Mastery practitioner.

As I looked over all the Angelic Mastery body of work, I got that it was time to revisit this and actually create the modality. At first I thought I would just take all of the sessions I had created in 2004-5 and just create a manual and begin attuning people to become Angelic Mastery Practitioners.

However, I have changed a lot over the last fifteen years and the more I looked at the old body of Angelic Mastery work the more I saw ways I could hugely upgrade and improve it.

Note: On the next page is a master healing art image I created for the Angelic and Elohim Mastery Energetic Healing Modality. This is just the first of ten images I created for this modality and manual. I included this image in the information package because looking at it energetically will help some of you to decide if you resonate energetically with this modality or not.

Angelic and Elohim Mastery Energetic Healing Modality

Introducing the New Improved Angelic and Elohim Mastery

The first huge change I made was to add the frequencies of the Elohim Councils of Love and Healing and especially the Over-Lighting Devas of Earth, Healing, DNA and the Body to the modality. The Elohim are the builders of Spirit. They are very focused on the physical creation and evolution of not only the planet but also human beings and every species living on the planet.

From a healing point of view they know more about the human body and genetics than anyone really since they are the spiritual beings responsible for creating and evolving the planet and all beings on the planet.

In a very simplified way the angels are very connected to the spiritual realms whereas the Elohim are largely responsible for the material realm of creation. Since each human being is basically a soul encased in flesh, in order to achieve holistic healing on all levels – genetic, physical, emotional, mental and spiritual - both the material and spiritual aspects of humanity must be looked at and addressed.

The combination of Angelic and Elohim frequencies to the Angelic and Elohim Mastery Healing Modality sessions logarithmically increases the power of the sessions because it addresses both the physical/material aspects of healing in addition to the spiritual aspect. Calling upon the power of the Over-Lighting Devas of Healing and DNA hugely increase the physical and genetic healing abilities of the modality.

The role of the angels in this healing modality is to help the person receiving healing to release low vibration, fear-oriented, negative, dysfunctional and toxic energies, weaknesses, imbalances, illness and disease states, patterns, programs, beings and influences and to replace them with unconditional love and core Source Energy. They also help us to align the healing and clearing with our heart and soul and to upgrade the health wellbeing and functioning of our chakras, meridians and nadis.

The role of the Elohim and Overlighting Devas in this healing modality is to help the person receiving the healing to actually embody the healing physically, genetically and mentally. They do this largely by aligning the areas being cleared, healed and upgraded by the angels with the original divine ideal energetic blueprints for the physical body, genetics and mental body of the person receiving the healing.

They utilize physical, genetic and minds/brains healing profiles to clear out the energetic and genetic weaknesses and to restore the original blueprints for the body, genetics and mind that do not have these weaknesses and imbalances. This helps each person receiving one of these healings to actually embody the healing on all levels.

Another important aspect of this modality is that these sessions include a lot of energetic re-scripting. So in a Angelic and Elohim Emotional Mastery session, not only are the negative emotions, feelings and beliefs cleared out, healed, released and dissolved with love but also the angels and devas help us to rescript the past of the person receiving the session to clear out as much of the imprints, memories and cellular memories as can be done at the time with ease and grace.

By tapping into the power and strengths of both the Angelic and Elohim kingdoms of consciousness, we are able to create a holistic modality that reflects the dual material and spiritual nature of each human being.

The Angelic Love and Healing Washes and Tones and the Elohim Embodying the Healing Templates are the core of the modality and they each are important enough to merit separate sections of the manual.

Angelic Love and Healing Washes and Tones

The Angelic Love and Healing Washes and Tones largely comprise the Angelic aspect of the Angelic/Elohim Mastery Healing Modality. This is basically a six step process. To help elaborate how this works I will use the example of the Angelic and Elohim Healing Mastery for the Central and Peripheral Nervous System.

The angels begin by scanning the energetic spaces, fields, organs, systems and bodies of the person receiving the healing. **The scan is focused on what area is being worked upon or being cleared and healed.** So basically when you transmit the Angelic and Elohim Healing Mastery for the Central and Peripheral Nervous System, the angels immediately scan the central and peripheral nervous system and all of its related organs and systems.

So the angels will not only focus the peripheral and central nervous systems but also the vertebrae, neck, tailbone, nerves, the neuro-nets in the minds and brains and all of the ways the central nervous system regulates and governs the rest of the body as well as all of the organs which are also wired into the central nervous system.

Once the scan is done and the angels have targeted all of the areas covered, included and influenced by the central and peripheral nervous system, the Angels of Love and Healing under the guidance of Archangel Gabriel will begin transmitting waves of unconditional love and core Source Energy to all of those areas. This part is called the **Angelic Love and Healing Wash.** Simultaneously they will transmit tones of sound healing comprised of unconditional love and core Source Energy to all of those areas. This part is called the **Angelic Love and Healing Tones.**

These angelic love and healing washes and tones hold such a high love vibration that anything that does not resonate with that vibration is dissolved in angelic love and light. After the low vibration energies, frequencies, beings, influences are dissolved, the central and peripheral nervous system, back, neck, vertebrae, tailbone, nerves, neuro nets and all associated organs and systems begin to hold the vibration of unconditional love and core Source Energy.

After the angels feel the central and peripheral nervous system holds as much love as it can at this time, the angels shift their focus to the chakras, meridians/strangeflows, nadis/acupuncture points. They use **Angelic Clearing and Healing Upgrades for the Chakras, Meridians and Nadis** to tweak them to help us to embody the healing work.

After upgrading the chakras and meridians and aligning everything that was cleared and upgraded with the energies of the Multidimensional Heart. This part is called the **Angelic Multidimensional Heart Alignment**. After the angels align the central and peripheral nervous with the energies of the soul and this part is called the **Angelic Soul Alignment**. So the Angelic Love and Healing Washes component of each Angelic and Elohim Mastery Healing Modality session is basically a six step process:

1. Scanning the Energetic Spaces, Fields, Organs, Systems and Bodies for the pattern you are working on clearing and healing.
2. Transmit **Angelic Love and Healing Washes** to the areas identified in Step 1 to clear, transmute, heal, release and dissolve low vibration energies, frequencies, beings and influences and to replace the cleared areas with unconditional love and pure Source Energy.
3. Transmit **Angelic Love and Healing Tones** to the areas identified in Step 1 to clear, transmute, heal, release and dissolve low vibration energies, frequencies, beings and influences and to replace the cleared areas with unconditional love and pure Source Energy.
4. Clear, heal and upgrade the health, wellbeing and functioning of the chakras, meridians and nadis using an **Angelic Clearing and Healing Upgrades for the Chakras, Meridians and Nadis**.
5. After upgrading the chakras and meridians to support the clearing healing work done through the washes and tones, the angels then align the cleared and healed area with the multidimensional heart using **Angelic Multidimensional Heart Alignments**.
6. Align the cleared and healed area with the soul using an **Angelic Soul Alignment**.

Elohim Embodying the Healing Templates

The Elohim Embodying the Healing Templates comprise the Elohim aspect of the Angelic/Elohim Mastery Healing Modality and occur simultaneously while the Angelic healing work is being done in the background. This is a seven step process.

Like the angels, the Elohim begin the session by scanning the energetic spaces, fields, organs and bodies of the person receiving the healing. But the focus of the Elohim differs from that of the Angels. The angels are primarily concerned with clearing low vibration energies, beings, influences, patterns, programs etc., then replacing and upgrading them with love and light and aligning the healing work to the heart and soul.

The Elohim Councils of Love and Healing and the Overlighting Devas of Humanity, the Body, Genetics and Mind/Brains are more concerned with healing energetic damage to the energetic and physical infrastructure. The Elohim and Overlighting Devas work with Divine Ideal Blueprints of Creation and their role in this healing modality is to help clear out energetic and genetic weaknesses that are not aligned with the divine ideal most perfect possible blueprints of creation for the person receiving the healing.

So the Angelic Love and Healing Washes component of each Angelic and Elohim Mastery Healing Modality session is basically a six step process:

1. Scanning the Energetic Spaces, Fields, Organs, Systems and Bodies for the pattern you are working on healing. They actually run several scans. The first one focuses on the physical body, systems and organs; the second one focuses on the genetics, epigenetics and morphogenetic fields and the third one focuses on the minds, brains, brain chemistry, personality, sub personalities and negative self talk.
2. After scanning, the Elohim and Over-Lighting Devas of Healing/Human Body compare what is going on physically in the body of the person being healed to the energetic blueprints for what a divine ideal human body would look like. They then run **Elohim Physical Healing Profiles** to dissolve any energetic weaknesses and imbalances in the physical/etheric spaces, fields, organs, systems and energetic bodies and to realign those areas with the Original Blueprints Of Creation for the Divine Ideal Human Body that do not have energetic weaknesses and imbalances.
3. After completing Step 2, the Elohim and Overlighting Devas shift their focus to the genetics, epigenetics and morphogenetic fields of the person receiving the healing.

They compare what is going on genetically within the person receiving the healing to what the Divine Ideal Human without any genetic weaknesses and imbalances. They then run **Elohim Genetic Healing Profiles** to dissolve any genetic, epigenetic or morphogenetic weaknesses and imbalances in the DNA/RNA, genome, epigenome and to realign those areas with the Original Blueprints Of Creation for the Divine Ideal Human Body that do not have any genetic, epigenetic or morphogenetic weaknesses and imbalances.

4. After completing Step 3, the Elohim and Overlighting Devas shift their focus to the minds, brains, personality/sub-personalities of the person receiving the healing. They compare what is going on mentally within the person receiving the healing to what the Divine Ideal Human without any mental weaknesses and imbalances. They then run **Elohim Minds/Brains/Personality Healing Profiles** to dissolve any mental or personality level weaknesses and imbalances in the minds, brains, personality, sub-personalities, the wiring/crosswiring of the subconscious mind, psychological archetypes, antahkarana, shadow side, brain chemistry, neuronets and to realign those areas with the Original Blueprints Of Creation for the Divine Ideal Human Body that does not have any mental or personality level weaknesses and imbalances.
5. After they complete the scanning and realign the body, genetics and mind to the Divine Ideal Blueprints of Creation, they then run an **Elohim Clearing and Healing Upgrades for the Chakras, Meridians and Nadis**.
6. After they do all of this the Elohim complete their part of the Angelic and Elohim Mastery session by running an **Elohim Embody the Healing Profile** to help upgrade the health, wellbeing and functioning of the human body on all levels to accept the healing, to receive it energetically 100% , to allow it in with ease and grace.
